

Work Instruction - Operations	 HITACHI Inspire the Next
PF TRACK CIRCUIT FAILURE	

Work description: This work instruction describes the handling of P.F. Track Circuit failures.		
Scope: This work instruction is written specifically for the OCC operating staff of Honolulu Rail Transit.		
References: Nil		
PPE and precautions	Competencies or qualifications	Licenses or permits required
Nil	OCC Supervisor, Train Controller, Information Controller, Engineering and Fault Controller	Nil
Tools and equipment required

Work Instruction - Operations	
PF TRACK CIRCUIT FAILURE	

<i>Engineering and Fault Controller</i>	<p>You must:</p> <ul style="list-style-type: none"> inform the maintainer to arrange a signaling technician to proceed to the failed PF track circuit for inspection coordinate with the Train Controller to allow the maintainer to access the track for inspection and back if required keep track of the inspection/repair progress inform the OCC Supervisor and the Train Controller about the latest inspection/repair progress
<i>OCC Supervisor</i>	<p>You must:</p> <ul style="list-style-type: none"> follow the inspection/fault rectifying progress closely assess the recommendations from the maintainer if clearing a train from the failed area is recommended, instruct the Train Controller to clear the train away from the failed area if the switch associated with the failed PF track circuit needs to be in normal position, then instruct the Train Controller to make the area safe for the maintainer to operate and to secure the switch(es) to normal positions manually if resetting the PF track circuit is recommended then instruct the Train Controller to make the area safe for the maintainer to reset the PF track circuit instruct the Information Controller to make regular public announcements on service delays to trains and stations follow the fault rectifying progress closely if the PF track circuit recovers then instruct the Information Controller to make public announcements on resumption of normal train service to trains and stations log the event in the OCC Supervisor Daily Report
<i>Information Controller</i>	<p>You must, on instructions from the OCC Supervisor:</p> <ul style="list-style-type: none"> make public broadcast announcements on service delays to trains and stations <p>make regular announcements to update trains and stations affected</p> <p>log the event in the Information Controller Log</p>
<i>Train Attendant</i>	<p>You must, on instructions from the Train Controller:</p> <ul style="list-style-type: none"> access the track to get to the train which is stranded in between stations <p>operate the train in BYPASS mode and drive the train to the nearest station</p>
