

Work Instruction - Operations	<b>HITACHI</b>
<b>TRAIN DATA RADIO FAILURE</b>	

<b>Work Description:</b> This work instruction describes the steps to handle train data radio failure		
<b>Scope:</b> This work instruction is written specifically for OCC operating staff of Honolulu Rail Transit.		
<b>References:</b> <ul style="list-style-type: none"> <li>HNL-09510 Minimum Operating Conditions Work Instruction</li> <li>HNL-09527 Fault Reporting Process</li> </ul>		
<b>PPE and precautions</b>	<b>Competencies or qualifications</b>	<b>Licenses or permits required</b>
Nil	Train Controller, Engineering & Fault Controller, Information Controller, Train & Stations Manager, OCC Supervisor, Train Operator	Nil
<b>Tools and equipment required</b>		
Nil		

Complete Data Radio Failure on a Train			
	<b>Note</b> Each E-Car has a Transportation Mobile Unit (TMU) connected to the on-board communication system network. This on-board dual architecture TMUs (one from each E-Car) within a train provides a redundant radio system such that a single TMU failure will not affect the data radio communication. Data radio failures are detected and notified at OCC by ATS and Communications workstations. In case of a complete failure (i.e. both TMUs fail), the following functionalities will not be available <b>on the train</b> : <ul style="list-style-type: none"> <li>On Board PA/PIS</li> <li>On Board ECP (T-Tel)</li> <li>On Board CCTV streaming to OCC</li> <li>ATC Radio commands</li> </ul> In this circumstance, the train shall be manned by a Train Operator until such time the train is removed from service (see HNL-09510 Minimum Operating Conditions Work Instruction).		
	Train Controller	You must: <ul style="list-style-type: none"> <li>Tell all OCC operating staff of the data radio communication failure on the train</li> <li>If there is no Train Operator on board, dispatch a Train Operator to get on the train at the specific station</li> <li>Tell the Train Operator to stay on board and be responsible to aid passengers in the absence of onboard PA/PIS, T-Tel, CCTV, until the train is taken out of service</li> <li>On instructions from the OCC Supervisor: <ul style="list-style-type: none"> <li>Arrange a replacement train with the Yard Controller</li> <li>Confirm the train is empty before taking the train off service and to the Yard</li> </ul> </li> <li>Log the event in the Train Controller Log</li> </ul>	
	OCC Supervisor	You must: <ul style="list-style-type: none"> <li>Decide the best strategy to continue the degraded service or replace the faulty train in accordance with HNL-09510 Minimum Operating Conditions Work Instruction</li> <li>Log the event in the OCC Supervisor Daily Report</li> </ul>	
	Information Controller	You must: <ul style="list-style-type: none"> <li>Wait until the Train Operator is on board the train then tell the Train Operator (via voice radio) to make local announcements as required – communicate with the Train Operator via voice radio</li> <li>With the assistance from the Train Operator, check and confirm CCTV, PA/PIS, ECP/T-TEL on the affected train are inoperable</li> <li>Log the event in the Information Controller Log</li> </ul>	
Approved By:	<input type="checkbox"/> Director, Operations and Maintenance		<input type="checkbox"/> Department Manager

<b>TRAIN DATA RADIO FAILURE</b>	 <b>Hitachi Rail Honolulu JV</b>

<i>Train Operator</i>	<p>You must:</p> <ul style="list-style-type: none"> <li>On instructions from the Train Controller, get on board the specified train from the specified station (if not already on board the train)</li> <li>Aid passengers in the absence of onboard PA/PIS, CCTV, T-TEL</li> <li>Provide feedback to Information Controller on the functionality tests of the onboard PA/PIS, T-TEL, CCTV</li> <li>If the train data radio failure is confirmed, in coordination with OCC disembark all passengers at the designated station</li> <li>Monitor conditions on board the train and inform the Train Controller of any anomaly</li> <li>On instructions from the Train Controller, accompany the train to the Yard or exit the train at the specified station</li> </ul>
<i>Engineering &amp; Fault Controller</i>	<ul style="list-style-type: none"> <li>Record the fault in the MMIS according to HNL-09527 Fault Reporting Process and coordinate with the maintenance team for maintenance intervention</li> <li>Monitor the fault rectifying progress and keep the OCC Supervisor and Information Controller informed</li> </ul>

Data Radio Failure on (a part of) the Wayside	
	<p><b>Note</b></p> <p>When a Data Radio Failure occurs in a section of the wayside, the following functionalities will not be available <b>for all the trains moving in that section</b>:</p> <ul style="list-style-type: none"> <li>On Board PA/PIS</li> <li>On Board ECP</li> <li>On Board CCTV streaming to OCC</li> <li>ATC Radio commands</li> </ul> <p>Data Radio Failures are detected and notified at OCC by ATS and Communications workstations.</p>
<i>Train Controller</i>	<p>You must:</p> <ul style="list-style-type: none"> <li>Tell all OCC operating staff of the data radio communication failure on the section of the wayside train</li> <li>Make certain that trains moving through the affected section are manned by Train Operators – so for trains with no Train Operator on board, dispatch a Train Operator to get on that train accordingly at the specific station</li> <li>Tell the Train Operators to stay on board in the affected section and be responsible to aid passengers in the absence of onboard PA/PIS, T-Tel, CCTV, at that specific section until otherwise being notified</li> <li>Log the event in the Train Controller Log</li> </ul>
<i>OCC Supervisor</i>	<p>You must:</p> <ul style="list-style-type: none"> <li>Decide the best strategy to continue the degraded service in accordance with HNL-09510 Minimum Operating Conditions Work Instruction</li> <li>Log the event in the OCC Supervisor Daily Report</li> </ul>
<i>Information Controller</i>	<p>You must:</p> <ul style="list-style-type: none"> <li>Coordinate with the Train Operators (via voice radio) to make local announcements as required – communicate with the Train Operator via voice radio</li> <li>Log the event in the Information Controller Log</li> </ul>
<i>Train Operator</i>	<p>You must:</p> <ul style="list-style-type: none"> <li>On instructions from the Train Controller, get on board the specified train from the specified station (if not already on board the train)</li> <li>Aid passengers in the absence of onboard PA/PIS, CCTV, T-TEL when trains moving through the affected section</li> <li>Monitor conditions on board the train and inform the Train Controller of any anomaly</li> </ul>
<i>Engineering &amp; Fault Controller</i>	<ul style="list-style-type: none"> <li>Record the fault in the MMIS according to HNL-09527 Fault Reporting Process and coordinate with the maintenance team for maintenance intervention</li> <li>Monitor the fault rectifying progress and keep the OCC Supervisor and Information Controller informed</li> </ul>

<b>TRAIN DATA RADIO FAILURE</b>	

Data Radio Failure on the entire Mainline (System-wide)	
	<p><b>Note</b></p> <p>When a Data Radio Failure occurs along the wayside, the following functionalities will not be available <b>for all the trains within the Mainline</b>:</p> <ul style="list-style-type: none"> <li>On Board PA/PIS</li> <li>On Board ECP</li> <li>On Board CCTV streaming to OCC</li> <li>ATC Radio commands</li> </ul> <p>Data Radio Failures are detected and notified at OCC by ATS and Communications workstations. In such a circumstance train service can only be maintained via Train Operators manning all the trains</p>
	<p><i>Train Controller</i></p> <p>You must:</p> <ul style="list-style-type: none"> <li>Tell all OCC operating staff of the data radio communication failure on the entire mainline</li> <li>Make certain each train on the mainline is manned by a Train Operator – so for trains with no Train Operator on board, dispatch a Train Operator to get on that train accordingly at the specific station</li> <li>Tell the Train Operators to stay on board and be responsible to aid passengers in the absence of onboard PA/PIS, T-Tel, CCTV, at that specific section until otherwise being notified</li> <li>Log the event in the Train Controller Log</li> </ul>
	<p><i>OCC Supervisor</i></p> <p>You must:</p> <ul style="list-style-type: none"> <li>Decide the best strategy to continue the degraded service in accordance with HNL-09510 Minimum Operating Conditions Work Instruction</li> <li>Log the event in the OCC Supervisor Daily Report</li> </ul>
	<p><i>Information Controller</i></p> <p>You must:</p> <ul style="list-style-type: none"> <li>Coordinate with the Train Operators (via voice radio) to make local announcements as required – communicate with the Train Operator via voice radio</li> <li>Log the event in the Information Controller Log</li> </ul>
	<p><i>Train Operator</i></p> <p>You must:</p> <ul style="list-style-type: none"> <li>On instructions from the Train Controller, get on board the specified train from the specified station (if not already on board the train)</li> <li>Aid passengers in the absence of onboard PA/PIS, CCTV, T-TEL until otherwise being notified</li> <li>Monitor conditions on board the train and inform the Train Controller of any anomaly</li> </ul>
<i>Engineering &amp; Fault Controller</i>	<ul style="list-style-type: none"> <li>Record the fault in the MMIS according to HNL-09527 Fault Reporting Process and coordinate with the maintenance team for maintenance intervention</li> <li>Monitor the fault rectifying progress and keep the OCC Supervisor and Information Controller informed</li> </ul>
